

REMARKABLE WOODWORKS

“THE 1 HOUR PLANTER BOX”

Material	Length	Quantity	Purpose
MicroPro Sienna Deck Boards	10'	6	body/ shelf
MicroPro Sienna 2x4	8'	5	legs/ shelf support
Deck Screws	3"	1 Box	screw the 2x4 legs together
Exterior Trim Screws	2 ½"	1 Box	screw the deck board together without splitting the wood
Black Paint (opp)	Quart	1	optional to give legs colour

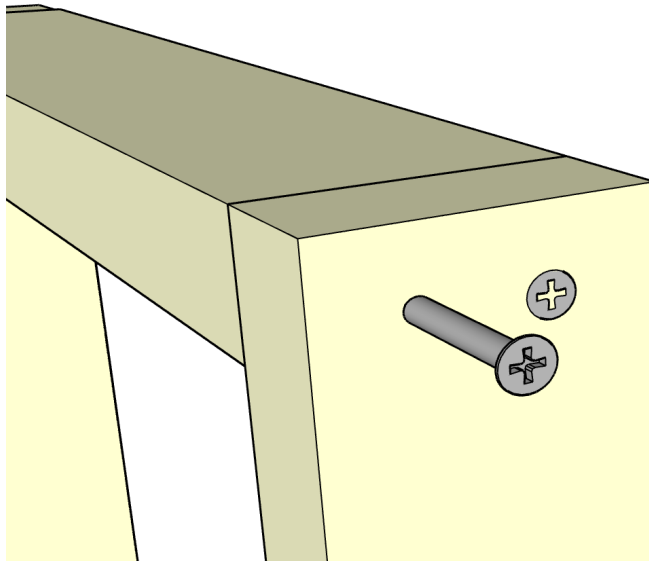

Recommended Tools

Miter Saw or Circular Saw
 Drill
 Sandpaper (150 grit)
 Speed Square
 Safety Glasses
 Measuring tape
 Pencil

Cut List

Label	Dimensions	Quantity	Purpose
Long (Orange)	Deck Board x 34"	8	Body Face / Shelf
Short (Orange)	Deck Board x 18"	6	Body Sides
Long (Yellow)	2"x4"x38"	4	Leg Sides
Short (Yellow)	2"x4"x18"	6	Leg Top/ Bottom/ Brace
(Green)	2"x4"x18"	2	Shelf Support

Building the legs:

1. Start by cutting the longest boards first. Place the short cuts inside the longer cuts at the top and bottom and use 2 of the 3" deck screws to face screw the boards together. TIP: use a stop block when cutting to speed up the multiple cuts and ensure they are all the same.
2. Once you have one leg together, repeat for the other side.

Building the body:

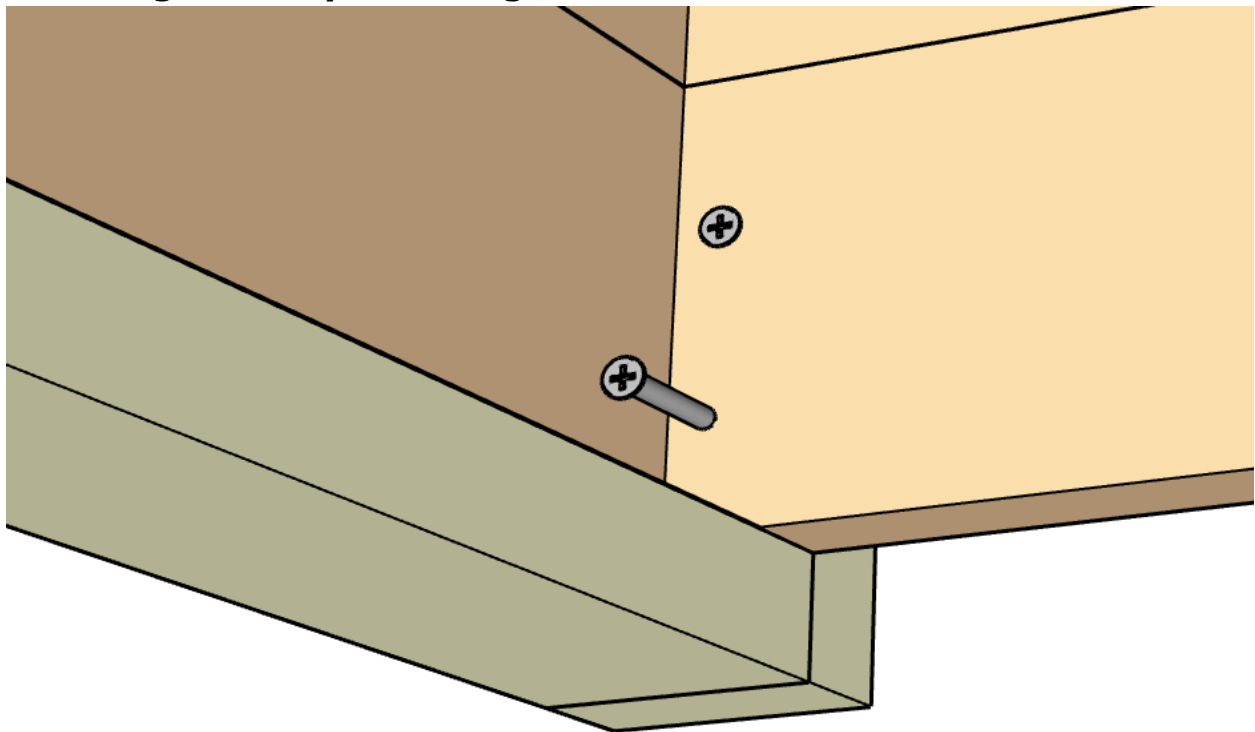

3. Start by cutting the longest boards first. Place the long cuts inside the short cuts at the both ends and use the 2" trim screws to face screw through the short boards and build a rectangle box.

4. Once you have built one box, repeat two more times until you have three rectangle boxes. TIP: Lightly hitting the cut edges with sandpaper will make the planter much more enjoyable to touch.

5. Attach the leg brace at the bottom of the body with 3" screws.

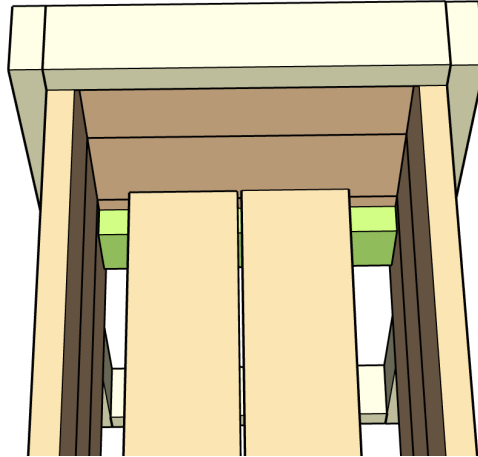

Attaching the body to the legs:

6. Place the body inside the legs one inch from the outside edge and use the 2" trim screws through the long sides to secure the body to the legs on the inside of the box. Make sure you are tight to the top of the legs. NOTE: Working with the top on the ground will make this process

7. Repeat this until all the rectangle boxes are stacked and then flip the planter over.

Installing the Shelf:

8. The green shelf supports can be installed by face screwing with the 2" trim screws on the short side of the body pieces. NOTE: Heights may vary depending on the height of the pants/ pots you are working with.

9. Simply place the two shelf boards onto the shelf braces (no need to attach them).

10. Take a quick video for Instagram and tag @remarkableworks @microprosienna & @Homedepotcanada.
